

Thrivent Aggressive Allocation Portfolio

Inception Date Apr. 29, 2005 **Ticker** QTAAPX **Total Portfolio Assets** \$2.05 billion **Expense Ratio** Gross: 0.91% Net: 0.75%*

Portfolio Description

This portfolio, the most aggressive in Thrivent's suite of Asset Allocation Portfolios, is designed for investors with a longer time horizon and higher risk tolerance. The Portfolio is globally diversified across major equity and fixed income sectors and styles. The Portfolio is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

Investment Strategy/Process

The Portfolio has a long-term target allocation of 95% equity securities and 5% fixed income. The Portfolio's asset allocation strategy starts with the construction of a model that sets the long-term target allocations for the broad asset classes of equity and fixed income. Next, the target weightings for sub-classes are determined. Equity sub-classes are often based on market capitalization (large, mid, and small), investment style (such as growth and value), economic sector. Fixed income sub-classes may be based on maturity, duration, security type or credit rating. The Portfolio may invest in foreign securities, including emerging markets. The portfolio management team actively manages the Portfolio with overweight and underweight positions in the various sub-classes based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Portfolio is regularly rebalanced to ensure that the holdings are within appropriate ranges.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventportfolios.com for performance results current to the most recent month-end.

The Portfolio is only available to the public through a variable life or variable annuity product. Performance data shown does not include any insurance or annuity charges, which if included would lower the returns. Contact the applicable insurance company for more information and a contract prospectus which will include information on the additional charges and fees that apply to the specific contract.

*The Adviser has contractually agreed, for as long as the current fee structure is in place, to waive certain investment advisory fees associated with the Portfolio. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower. ©2024 Morningstar, Inc. All rights reserved. Investment Objective

Thrivent Aggressive Allocation Portfolio seeks long-term capital growth.

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

S&P 500® Index is a market-cap weighted index that represents the average performance of a group of 500 large-capitalization stocks.

MSCI All Country World Index ex-USA - USD Net

Returns measures equity market performance in global developed and emerging markets outside of the US.

Bloomberg US Aggregate Bond Index measures the performance of U.S. investment grade bonds.

Portfolio Management & Experience

Risks: The Portfolio's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Portfolio's asset classes, market cap groups, investment styles, and issuers. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Portfolio invests in other funds; therefore, the Portfolio is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. The use of quantitative investing techniques also involves risks. These and other risks are described in the prospectus.
