**Inception Date** Nov. 30, 2001    **Ticker** QTACPX    **Total Portfolio Assets** \$202.76 million    **Expense Ratio** Gross: 0.67%

## Portfolio Description

This Portfolio invests across the broad U.S. stock market. The Portfolio may hold investments in small, medium, and large companies across the growth, value, and core investment styles.

## Investment Strategy/Process

The Portfolio management team uses active quantitative management techniques to forecast investment returns and to measure how the returns of different securities move in relation to each other. The process uses factor models. The team constructs a risk-optimized portfolio of securities of any market capitalization and market sector. The Portfolio is expected to be well-diversified with stock from the broad U.S. stock market.

**Risks:** The Portfolio's value is influenced by a number of factors, including the performance of the broader market and risks specific to the Portfolio's asset classes, market cap groups, investment styles, and issuers. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The use of quantitative investing techniques also involves risks. The Portfolio may have significant positions in one or more sectors of the market and may invest more heavily in particular sectors than others which may impact performance. These and other risks are described in the prospectus.

Effective April 30, 2025, the Portfolio transitioned from a fundamental to a fully quantitative strategy. Performance prior to that date reflects the previous strategy, which may not be representative of the current investment approach.
