 Total Portfolio Assets \$19.51 million
 Expense Ratio Gross: 2.30%
 Net: 0.38%*

Portfolio Description

This Portfolio normally invests in the common stocks of companies included in the MSCI KLD 400 Social Index in the proportions at which they are represented in the Index. It is designed to provide investors with exposure to US companies that demonstrate an ability to effectively manage their environmental, social and governance (“ESG”) risks and opportunities, and that are not involved in certain business activities. Companies are selected based on data from MSCI ESG research. Investors should be comfortable with the potential decrease in diversification that may arise because of the screens and ESG criteria inherent to the index.

Investment Strategy/Process

This is a passively-managed Portfolio, which means that the portfolio manager does not actively choose the securities that should make up the Portfolio. The MSCI KLD 400 Social Index is comprised of about 400 US company stocks with outstanding environmental, social and governance (“ESG”) ratings and excludes exposure to companies with negative social or environmental impacts. The Index is adjusted quarterly, and when changes to the Index occur, the portfolio manager will attempt to replicate these changes within the Portfolio. However, any such changes may result in slight variations from time to time.

Average Annualized Returns (%) Periods less than one year are not annualized

	3 Month	YTD	1 Year	3 Year	5 Year	10 Year	Since Incept
ESG Index	8.68	16.14	41.26	N/A	N/A	N/A	41.73
MSCI KLD 400 Social Index	8.88	16.55	42.22	20.01	18.58	15.14	N/A
Lipper Lg-Cap Core Fds Median**	8.06	14.71	38.90	17.47	16.54	13.66	N/A

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventportfolios.com for performance results current to the most recent month-end.

The Portfolio is only available to the public through a variable life or variable annuity product. Performance data shown does not include any insurance or annuity charges, which if included would lower the returns. Contact the applicable insurance company for more information and a contract prospectus which will include information on the additional charges and fees that apply to the specific contract.

*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees and/or reimburse certain expenses associated with the Portfolio. Refer to the Fees & Expenses table in the Portfolio's prospectus.

**Source: Lipper. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent ESG Index Portfolio seeks total returns that track the performance of the MSCI KLD 400 Social Index, which is composed of companies selected by the index provider based on environmental, social and governance characteristics.

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

MSCI KLD 400 Social Index represents 400 U.S. securities that provide exposure to companies with outstanding ESG ratings and excludes companies whose products have negative social or environmental impacts.

Portfolio Management & Experience

Brian W. Bomgren, CQF Industry: 2006 Portfolio: 2020; Sharon Wang, CFA, FRM Industry: 2001 Portfolio: 2020

Risks: The Portfolio primarily invests in U.S. stocks with outstanding environmental, social and governance (“ESG”) ratings and excludes companies with negative social or environmental impacts. The Portfolio's ESG investment strategy limits the types and number of investment opportunities available to the Portfolio, which may result in underperformance relative to other funds that do not have an ESG focus. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. An ETF is subject to additional fees and expenses, tracking error, and the risks of the underlying investments that it holds. The use of derivatives such as futures involves additional risks. Large cap companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. Medium-sized companies often have greater price volatility and less liquidity than larger companies. Markets may also be impacted by domestic or global events, including public health threats, terrorism, natural disasters or similar events. The Portfolio attempts to track the performance of the MSCI KLD 400 Social Index but the return may not match that of the Index due to several factors including timing and expenses. The Portfolio may engage in active and frequent trading of portfolio securities, which may result in higher transaction costs and higher taxes. These and other risks are described in the prospectus.
