

Thrivent International Index Portfolio

Ticker: QTIPX

Inception: April 29, 2020

Objective: The Thrivent International Index Portfolio seeks total returns that track the performance of the MSCI EAFE Index.

Facts about Thrivent’s Index Portfolio product suite

Thrivent International Index Portfolio offers shareholders the ability to gain passive investment exposure to 21 different developed markets excluding the U.S. and Canada.

Five equity indexes

Thrivent offers five different index portfolios, providing U.S., International and ESG exposure across the market capitalization universe. The domestic portfolios track the S&P SmallCap 600¹, S&P MidCap 400², S&P 500³, and MSCI KLD 400 Social⁴ Indexes. The international portfolio tracks the MSCI EAFE⁵ Index.

Market replication

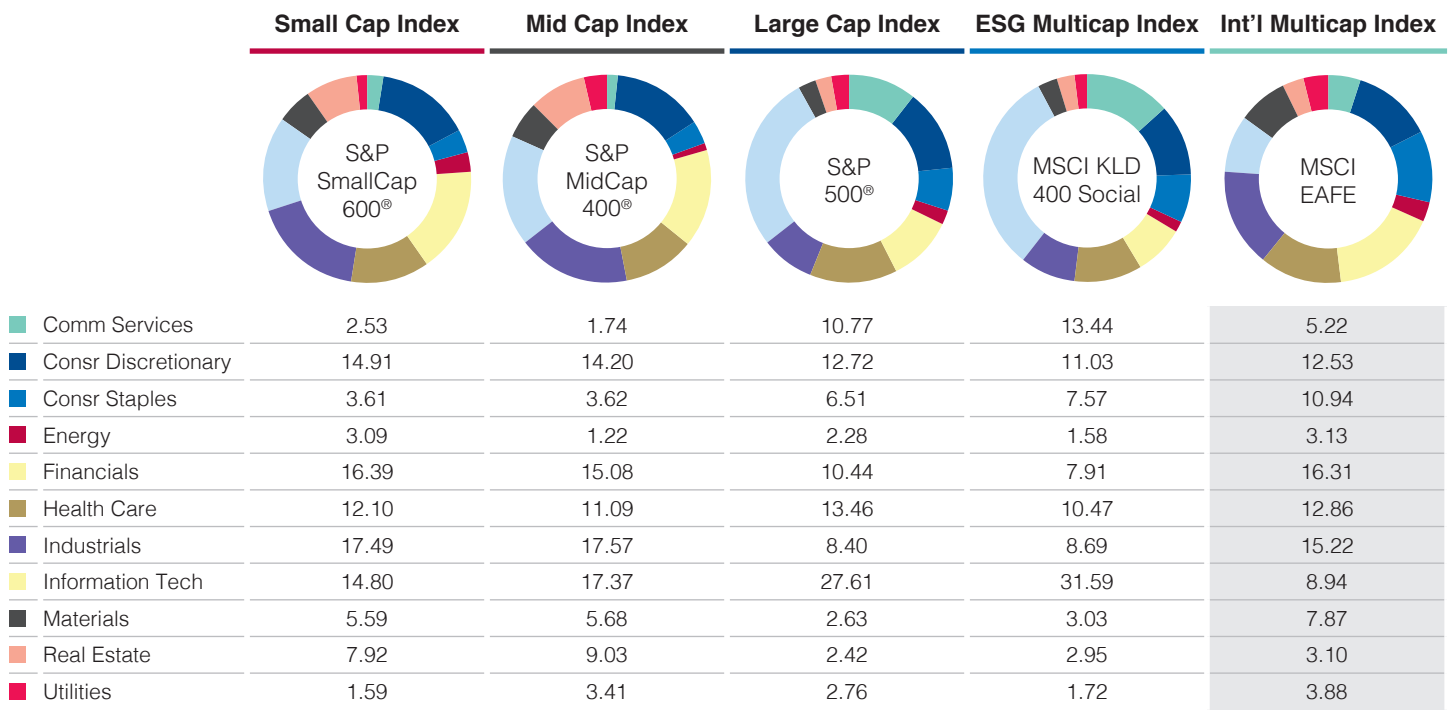

We utilize full replication for tracking the indexes. This means that each portfolio tracks the index by directly buying—in the same proportions—the underlying securities that make up the index.

Broad market exposure

Combined, these five portfolios track approximately 90% of the U.S. market capitalization and approximately 85% of international market capitalization.⁶ The index portfolios provide investors with an extensive amount of potential market exposure.

Risks: The Portfolio primarily invests in non-U.S. equity securities. Foreign investments involve additional risks, including currency fluctuations, liquidity, political, economic and market instability, and different legal and accounting standards. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. Large-cap companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. Medium-sized companies often have greater price volatility and less liquidity than larger companies. Markets may also be impacted by domestic or global events, including public health threats, terrorism, natural disasters or similar events. The use of derivatives such as futures involves additional risks. The Portfolio attempts to track the performance of the MSCI EAFE Index but the return may not match that of the Index due to several factors including timing, expenses and the foreign investment process. These and other risks are described in the prospectus.

The Portfolio is only available to the public through a variable life or variable annuity product. Contact the applicable insurance company for more information and a contract prospectus which will include information on the additional charges and fees that apply to the specific contract.

The funds or securities referred to herein are not sponsored, endorsed, issued, sold or promoted by MSCI, and MSCI bears no liability with respect to any such funds or securities or any index on which such funds or securities are based. The prospectus contains a more detailed description of the limited relationship MSCI has with Thrivent and any related funds.
