

Thrivent Large Cap Value Portfolio

Inception Date Nov. 30, 2001 **Ticker** QTLCVX **Total Portfolio Assets** \$2.29 billion **Expense Ratio** Gross: 0.63%

Portfolio Description

This portfolio looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Portfolio typically invests in large company "value" stocks. Value stocks are companies that trade at a lower price compared to the market average, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team also seeks to invest in stocks that they believe are undervalued, which may be because the company is out of favor or has been temporarily overlooked. The team uses fundamental, quantitative and technical investment research techniques in an effort to identify high-quality businesses that are trading at attractive prices, but have good prospects for long-term capital appreciation. Catalysts for improvement may include factors such as improving economic conditions, new industry developments, or a company's plan to improve the business.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventportfolios.com for performance results current to the most recent month-end.

The Portfolio is only available to the public through a variable life or variable annuity product. Performance data shown does not include any insurance or annuity charges, which if included would lower the returns. Contact the applicable insurance company for more information and a contract prospectus which will include information on the additional charges and fees that apply to the specific contract.

Risks: Large companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The Portfolio's value is influenced by a number of factors, including the performance of the broader market, and risks specific to the Portfolio's asset classes, investment styles, and issuers. Markets may also be impacted by domestic or global events, including public health threats, terrorism, natural disasters or similar events. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. These and other risks are described in the prospectus.
