

Thrivent Mid Cap Index Portfolio

Ticker: QTMCIX

Inception: March 1, 2001

Objective: The Portfolio seeks total returns that track the performance of the S&P MidCap 400® Index.

Facts about the Thrivent Index Portfolio product suite

Thrivent Mid Cap Index Portfolio is one of five Thrivent Index Portfolios that seek to track a respective index benchmark.

Five equity indexes

Thrivent offers five different index portfolios, providing U.S., International and ESG exposure across the market capitalization universe. The domestic portfolios track the S&P SmallCap 600¹, S&P MidCap 400², S&P 500³ and MSCI KLD 400 Social⁴ indexes. The international portfolio tracks the MSCI EAFE⁵ Index.

Market replication

We utilize full replication for tracking the indexes. This means that each portfolio tracks the index by directly buying—in the same proportions—the underlying securities that make up the index.

Broad market exposure

Combined, these five portfolios track approximately 90% of the U.S. market capitalization and approximately 85% of international market capitalization.⁶ The index portfolios provide investors with an extensive amount of potential market exposure.

Risks: Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. Markets may also be impacted by domestic or global events, including public health threats, terrorism, natural disasters or similar events. The use of derivatives such as futures involves additional risks. The Portfolio attempts to track the performance of the S&P MidCap 400 Index but the return may not match that of the Index due to several factors including timing, expenses and the foreign investment process. These and other risks are described in the prospectus.
