

Thrivent Mid Cap Stock Portfolio

Inception Date Mar. 01, 2001 **Ticker** QTMCSX **Total Portfolio Assets** \$2.59 billion **Expense Ratio** Gross: 0.66%

Portfolio Description

This portfolio looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Portfolio typically invests in a combination of mid-sized companies across the growth and value spectrums. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Mid-sized companies may be more established than small companies but have the opportunity to experience faster growth as they seek to become large-cap companies. However, they typically have greater risk than larger, more-seasoned companies.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management. The Portfolio invests in a diversified portfolio of growth and value stocks with improving or positive outlooks relative to market expectations. The process begins with idea generation and screening to identify stocks that have certain characteristics. The team uses fundamental and other investment research techniques to identify and purchase mid-sized companies that are in industries with good economic outlooks, have strong prospects for growth in their sales and earnings, have high-quality management teams, and/or have strong financial positions. The team monitors risk in an effort to build a well-diversified portfolio.

Growth of \$10,000 and Calendar Year Performance (%)

□ Calendar Year Total Returns (CYTR) - without charges, fees, or expenses

■ Total Market Value (reflects reinvestment of all dividends and capital gains) - \$30,196

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventportfolios.com for performance results current to the most recent month-end.

The Portfolio is only available to the public through a variable life or variable annuity product. Performance data shown does not include any insurance or annuity charges, which if included would lower the returns. Contact the applicable insurance company for more information and a contract prospectus which will include information on the additional charges and fees that apply to the specific contract.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower. ©2024 Morningstar, Inc. All rights reserved. Risks: Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. The Portfolio's value is influenced by a number of factors, including the performance of the broader market, and risks specific to the Portfolio's asset classes, investment styles, and issuers. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. These and other risks are described in the prospectus.

Risk/Volatility Measures

Beta (3-year vs. S&P 500® Index): A measure of the volatility, or market risk, of an investment compared to the broad U.S. large-cap stock market.

Standard Deviation: Measures risk by showing how much a portfolio fluctuates relative to its average return over a period of time.

	Portfolio	S&P 500® Index ^{\$\$}
3 Year	20.96	17.60
5 Year	22.79	18.37
10 Year	18.70	15.16

Equity Characteristics

Market Capitalization is a measure of the size of the companies held in the portfolio, calculated by multiplying a company's total outstanding shares by the stock price.

	Portfolio	S&P 500® ^{\$\$}
Median Mkt Cap	\$17.74 B	\$35.42 B
Weighted Avg Mkt Cap	\$21.93 B	\$803.92 B

Price to Earnings (P/E) Ratio: A valuation ratio of a company's current share price compared to its earnings per-share, calculated by dividing the market value per share by its trailing 12-month earnings.

	Portfolio	S&P 500® ^{\$\$}
P/E Ratio	19.18	26.13

Return on Equity (ROE): A measure of corporate profitability that shows how much net income the companies in the portfolio have generated as a percentage of shareholder equity.

	Portfolio	S&P 500® ^{\$\$}
ROE	20.73%	28.54%

†Turnover Ratio: 12-month rolling as of Feb 29 2024. A measure of a Portfolio's trading activity calculated by dividing the lesser of long-term purchases/sales by average long-term market value.
