

# Thrivent Partner Growth Stock Portfolio

**Portfolio Inception Date** Nov. 30, 2001  
**Ticker** QTGRSX  
**Total Portfolio Assets** \$290.5 million

## Portfolio Description

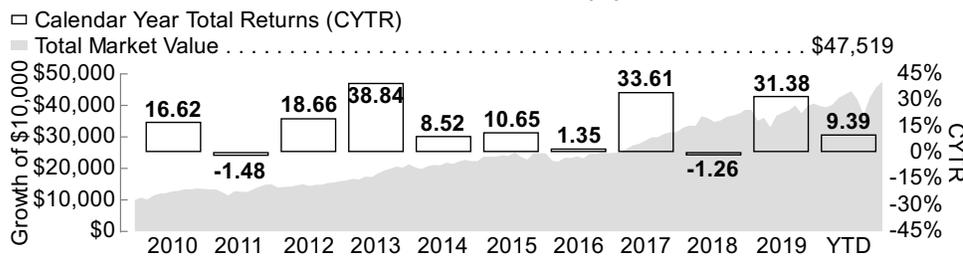

This portfolio is managed by T. Rowe Price Associates, Inc. and typically invests in large company "growth" stocks. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

**Pending shareholder approval, this portfolio will merge into Thrivent Large Cap Growth Portfolio on or around Aug. 31, 2020. The Portfolio will close to new shareholders after the close of business day on Jul. 17, 2020. See the prospectus for details.**

## Investment Strategy/Process

The Portfolio seeks to provide long-term capital appreciation potential by focusing on established growth companies with proven performance records. The portfolio management team seeks investments in companies that have the ability to pay increasing dividends through strong cash flow. The team generally looks for companies with an above-average rate of earnings growth and a lucrative niche in the economy that gives them the ability to sustain earnings momentum even during times of slow economic growth. T. Rowe Price believes that when a company increases its earnings faster than inflation and the economy, the market will eventually reward it.

## Growth of \$10,000 and Calendar Year Performance (%)

Performance shown reflects annual portfolio operating expenses. Performance data does not include any charges related to an insurance or annuity contract in which this portfolio may be held, which would reduce performance data shown.

## Average Annualized Returns (%)

Periods less than one year are not annualized.

This portfolio is only available to the public through a variable life or a variable annuity contract. Performance data shown does not include any insurance or annuity charges, which if included would lower the returns. Contact the provider for information and a contract prospectus which will include information on the additional charges and fees that apply to the specific contract.

<sup>1</sup>Source: Lipper. The Lipper median represents the median annualized total return for all reported portfolios in the classification. Lipper medians do not include sales charge/fees. If included, returns would have been lower.

## Investment Objective

**Risks:** The Portfolio's value is influenced by a number of factors, including the performance of the broader market, and risks specific to the Portfolio's asset classes, investment styles, and issuers. Common stocks of companies that rely extensively on technology, science or communications in their product development or operations may be more volatile than the overall stock market and may or may not move in tandem with the overall stock market. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability. The use of derivatives such as futures also involve risks. These and other risks are described in the prospectus.
