**Portfolio Description**

The Thrivent Small Cap Stock Portfolio looks to provide investors with competitive performance through favorable stock selection while monitoring risk. The Portfolio typically invests in a combination of both small-capitalization “growth” stocks and “value” stocks. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market average, as measured by valuation ratios that compare the stock’s price to the company’s earnings and growth trends. Small companies may have the opportunity to grow more rapidly than larger companies as they potentially emerge from small- to medium-sized companies. However, they typically do not pay significant dividends to shareholders and instead reinvest earnings back into the company. Smaller companies have greater volatility (or more risk) because they are often less-seasoned, have narrower product lines, less liquidity, smaller revenues and fewer resources than larger companies.

**Investment Strategy/Process**

The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental, quantitative and technical investment research techniques to identify and purchase small, financially-sound companies that appear to have strong, long-term growth prospects and capable management teams.

*Risks: The Portfolio primarily invests in securities of small companies. Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. The value of the Portfolio is influenced by factors impacting the overall market, certain asset classes, certain investment styles, and specific issuers. The Portfolio may incur losses due to investments that do not perform as anticipated by the investment adviser. These and other risks are described in the Portfolio’s prospectus.*
