

Thrivent Money Market Portfolio

Ticker: QTMMMPX

Inception: January 9, 1987

Objective: The Portfolio seeks a high level of current income, while maintaining liquidity and a constant net asset value of \$1.00 per share.

Portfolio key points

A proven cash management tool

Thrivent Money Market Portfolio is a long-standing cash management option for investors who seek to potentially earn more income on their cash holdings while maintaining principal and liquidity.

An active approach to security selection

The portfolio management team strives to produce income while maintaining liquidity. The team may accomplish this by selecting from the available supply of short-term U.S. government securities based on its interest rate outlook and analysis of quantitative and technical factors.

Government fund classification

The Portfolio is classified as a government fund under recent Securities and Exchange Commission regulation, which means that it is open to all investors, including individuals, corporations, and foundations. It invests primarily in highly liquid U.S. government securities and cash. The Portfolio is also unlikely to impose any fees or gates on investors given the highly conservative nature of the portfolio.

Risks: The Portfolio invests at least 99.5% of its assets in government securities, cash and repurchase agreements collateralized fully by government securities or cash. You could lose money by investing in the Portfolio. Although the Portfolio seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Portfolio is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Portfolio sponsor has no legal obligation to provide financial support to the Portfolio and you should not expect that the sponsor will provide financial support to the Portfolio at any time. The value of U.S. government securities may be affected by changes in the credit rating of the U.S. government and may not be fully guaranteed by the U.S. government. If the seller of a repurchase agreement defaults, the Portfolio may incur losses. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. Markets may also be impacted by domestic or global events, including public health threats, terrorism, natural disasters or similar events. A weak economy, strong equity markets, or changes to the Federal Reserve's monetary policies may cause short-term interest rates to increase and affect the Portfolio's ability to maintain a stable share price. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer not pay its debt. In unusual circumstances, the Portfolio could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. These and other risks are described in the prospectus.

Management

William D. Stouten
Senior Portfolio Manager
Industry since: 1993
Thrivent since: 2001
Portfolio since: 2003

“Having a broadly diversified portfolio gives us the opportunity to add some higher yielding securities that can help boost the yield while only slightly increasing volatility.”

You could lose money by investing in Thrivent Money Market Portfolio. Although the Portfolio seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Portfolio is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Portfolio's sponsor has no legal obligation to provide financial support to the Portfolio, and you should not expect that the sponsor will provide financial support to the Portfolio at any time. These and other risks are described in the Portfolio's prospectus.

The Portfolio is only available to the public through a variable life or variable annuity product. Contact the applicable insurance company for more information and a contract prospectus which will include information on the additional charges and fees that apply to the specific contract.

Before investing, investors should consider carefully the investment objectives, risks, charges and expenses of a portfolio and the variable insurance product. This and other important information is contained in the portfolio and variable insurance product prospectuses, which may be obtained from a financial professional or by contacting the applicable insurance company. Read them carefully before investing.
