

# Thrivent Money Market Portfolio

**Ticker** QTMMPX

**Inception date** Jan. 9, 1987

**Objective** Thrivent Money Market Portfolio seeks to achieve maximum current income that is consistent with stability of capital and maintenance of liquidity.

## Portfolio key points

### A proven cash management tool

Thrivent Money Market Portfolio is a long-standing cash management option for investors who seek to potentially earn more income on their cash holdings than they could with a savings account while maintaining principal and liquidity.

### An active approach to security selection

The portfolio management team strives to produce income while maintaining liquidity. The team may accomplish this by selecting from the available supply of short-term U.S. government securities based on its interest rate outlook and analysis of quantitative and technical factors.

### Government fund classification

The Portfolio is classified as a government fund under recent Securities and Exchange Commission regulation, which means that it is open to all investors including individuals, corporations, and foundations. It invests primarily in highly liquid U.S. government securities and cash. The Portfolio is also unlikely to impose any fees or gates on investors given the highly conservative nature of the portfolio.

“Our goal with Thrivent Money Market Portfolio is to provide a stable cash management option for our shareholders. The focus on benefiting our shareholders gives our daily work purpose, and no matter what I do, I will always want my work to have a purpose.”

**Risks:** U.S. government securities may not be fully guaranteed by the U.S. government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The Adviser’s assessment of investments may prove incorrect, resulting in losses or poor performance. The Portfolio’s value is influenced by a number of factors, including the performance of the broader market. The Portfolio invests in other funds; therefore, the Portfolio is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. If the seller of a repurchase agreement defaults, the Portfolio may incur losses. These and other risks are described in the prospectus.

The Portfolio is only available to the public through a variable life or variable annuity product. Contact the applicable insurance company for more information and a contract prospectus which will include information on the additional charges and fees that apply to the specific contract.

**You could lose money by investing in the Portfolio. Although the Portfolio seeks to preserve the value of your investment at \$1.00 per share,**

**it cannot guarantee it will do so. An investment in the Portfolio is not a bank account and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Portfolio’s sponsor is not required to reimburse the Portfolio for losses, and you should not expect that the sponsor will provide financial support to the Portfolio at any time, including during periods of market stress.**

**Before investing, investors should consider carefully the investment objectives, risks, charges and expenses of a portfolio and the variable insurance product. This and other important information is contained in the portfolio and variable insurance product prospectuses, which may be obtained from a financial professional or by contacting the applicable insurance company. Read them carefully before investing.**
