<sup>2</sup>7-Day Current Yield is the yield generated by an investment in the Portfolio over a 7-day period ended on the date of the calculation and expressed as an annual percentage. 7-Day Effective Yield is calculated similarly to the 7-day current yield, except that the effective yield assumes that income earned from the Portfolio's investments is reinvested and generating additional income. It is expressed as an annual percentage. The yield quotation more closely reflects the current earnings of the Thrivent Money Market Portfolio than the total return quotation.
