

# Thrivent Opportunity Income Plus Portfolio

**Inception Date** Apr. 30, 2003    **Ticker** QTOIPX    **Total Portfolio Assets** \$165.89 million    **Expense Ratio** Gross: 0.66%

## Portfolio Description

This portfolio generates income by investing predominantly in a diversified mix of high-income fixed income securities. It invests primarily in higher-yielding, higher-risk, fixed income securities to generate income, while the equity holdings are generally opportunistic investments. Investments are diversified across sectors in order to manage risk and potentially provide more stability when interest rates rise. The Portfolio is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

## Investment Strategy/Process

The Portfolio primarily invests in a broad range of debt securities. The portfolio management team actively manages the Portfolio with overweight and underweight positions in the various sectors based on their views of the market and economy. Fixed income securities and equity holdings are analyzed and selected on an ongoing basis. The Portfolio is regularly rebalanced to ensure that the holdings are within appropriate ranges.

## Growth of \$10,000 and Calendar Year Performance (%)

□ Calendar Year Total Returns (CYTR) - without charges, fees, or expenses  
■ Total Market Value (reflects reinvestment of all dividends and capital gains) - \$12,814

## Average Annualized Returns (%) Periods less than one year are not annualized

**All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit [thriventportfolios.com](http://thriventportfolios.com) for performance results current to the most recent month-end.**

The Portfolio is only available to the public through a variable life or variable annuity product. Performance data shown does not include any insurance or annuity charges, which if included would lower the returns. Contact the applicable insurance company for more information and a contract prospectus which will include information on the additional charges and fees that apply to the specific contract.

\*\*The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower. ©2024 Morningstar, Inc. All rights reserved. **Risks:** Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. Leveraged loans, sovereign debt, mortgage-related and other asset-backed securities are subject to additional risks. The Portfolio's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Portfolio's asset classes, investment styles, and issuers. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives such as futures involves additional risks. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Portfolio invests in other funds; therefore, the Portfolio is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. The Portfolio may engage in active and frequent trading of securities, which may result in higher transaction costs and taxes. When interest rates fall, certain obligations will be paid off more quickly and proceeds may have to be invested in lower-yielding securities with lower yields. These and other risks are described in the prospectus.
