Fund Description

This Fund looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in mid-sized companies across the value spectrum. Value stocks are companies that trade at a lower price compared to the market, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Mid-sized companies may be more established than small companies but have the opportunity to experience faster growth as they seek to become large-cap companies. However, they typically have greater risk than larger, more-seasoned companies. This ETF is newly formed and has a limited operating history.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management. The Fund invests in a diversified portfolio of value stocks with improving or positive outlooks relative to market expectations. The process begins with idea generation and screening to identify stocks that have certain characteristics. The team uses fundamental and other, investment research techniques to seek to identify and purchase stocks of mid-sized companies that are undervalued in relation to their long-term earnings potential or asset value, and monitor risk in an effort to build a well-diversified portfolio.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. A fund's performance for very short time periods may not be indicative of future performance. Market returns are based on the midpoint of the bid/ask spread at market close (typically, 4 p.m. ET) and do not represent returns an investor would receive if shares were traded at other times. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventETFs.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower. ©2025 Morningstar, Inc. All rights reserved. Risks: This ETF is newly formed and has a limited operating history. Medium-sized companies may experience greater price volatility, lower trading volume, and less liquidity compared to larger firms. Value investing includes undervalued securities whose value may not rise as quickly as anticipated if the market doesn't recognize their intrinsic value. Securities may be affected by company performance and market conditions. These and other risks are described in the prospectus.

Prior to close of business on 11/14/2025, this ETF operated as an open-end mutual fund (the "Predecessor Fund") with the same investment objective, strategy, and investment adviser as the Predecessor Fund. Prior to the ETF's listing on 11/17/2025, the S Class share NAVs of the Predecessor Fund are used to represent both the NAV and market price return history of the ETF. The ETF's structural, expense, and fee differences may result in performance differences over time.
