

Thrivent Limited Maturity Bond Fund

Inception Date Oct. 29, 1999 **Ticker** LBLAX **Total Fund Assets** \$1.68 billion **Expense Ratio** Gross: 0.60%

Fund Description

This fund invests primarily in investment-grade corporate bonds, government bonds, asset-backed securities, mortgage-backed securities and collateralized debt obligations. The Fund may also invest a portion of assets in foreign securities. The dollar-weighted average effective maturity for the Fund is expected to be between one and five years. The Fund's shorter duration makes it less sensitive to interest rate changes than some longer-duration funds. As a result, the Fund may be appropriate for an investor who is seeking the opportunity to generate a modest level of income (with some investment risk), but with less interest rate risk and a lower return potential than most longer-maturity bond funds.

Investment Strategy/Process

The portfolio management team seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental, quantitative and technical investment research techniques to determine which debt securities to buy and sell. The Fund's investment adviser generally focuses on issuers that it believes are financially sound and that have strong cash flows and earnings. The Fund may use an interest-rate management technique that includes the purchase and sale of U.S. Treasury securities and related futures contracts for the purpose of managing the duration of the Portfolio.

Growth of \$10,000 and Calendar Year Performance (%)

Calendar Year Total Returns (CYTR)
 Total Market Value (assumes the reinvestment of all dividends and capital gains) - \$12,110
 Current Value of Reinvested Dividends and Capital Gains - \$1,942

Performance shown does not reflect the sales charge. Other share class performance may vary due to differences in expenses.

Average Annualized Returns (%)

Periods less than one year are not annualized

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

**Source: Lipper. The Lipper median represents the median annualized total return for all reported funds in the classification. Lipper medians do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Limited Maturity Bond Fund seeks a high level of current income consistent with stability of principal.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Bloomberg Barclays Government/Credit 1-3 Year Bond Index measures the performance of U.S. government bonds with maturities of 1-3 years.

Risks: The Fund's value is influenced by a number of factors impacting the overall market, in particular debt securities and specific issuers. The value of U.S. government securities may be affected by changes in the credit rating of the U.S. government and may not be fully guaranteed by the U.S. government. The value of mortgage-related and other asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. In addition to typical risks associated with fixed income and asset-backed securities, collateralized debt obligations are subject to additional risks. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer not pay its debt. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. Markets may also be impacted by domestic or global events, including public health threats, terrorism, natural disasters or similar events. The use of futures contracts involves additional risks such as a loss in value in the underlying instrument, which could decrease the Fund's value. High yield securities are subject to increased credit risk as well as liquidity risk. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The Fund may engage in active and frequent trading of portfolio securities in implementing its principal investment strategies, which may result in higher transaction costs and higher taxes. These and other risks are described in the prospectus.
