How To Use This Booklet

You'll find a wealth of information about Thrivent Mutual Funds in this booklet, including each Fund's:

- Performance over the period.
- Investment objectives and risks.
- Portfolio management team, their processes and their strategies.

To provide context and a performance comparison, we also include the performance of the Fund's benchmark(s) and Morningstar peer group (when applicable).

All data represents past performance and does not guarantee future results.

People

Our team has more than 125 investment professionals who bring their deep expertise to managing Thrivent funds so you can feel confident in the choices you make. Of these individuals:

- More than 80% have at least 10 years of experience.
- Over 50% have more than 20 years of investment experience.
- More than 85% have earned the Chartered Financial Analyst designation, an advanced degree, or both.

We manage not only a family of mutual funds, but variable subaccount portfolios, and the general account assets for Thrivent, a Fortune 500 company with \$162 billion in assets under management/advisement¹ (as of Dec. 31, 2022).

Philosophy

Thrivent Asset Management, LLC, together with its parent company, Thrivent—which has been around for over a century—have operated with an emphasis on integrity. To best serve our clients, our team is committed to an investment philosophy that includes these goals:

- Consistent, competitive performance over the long-term. Our portfolio managers aim to achieve long-term investment success by focusing on in-depth, proprietary research in asset allocation, portfolio management and security selection. Our products combine fundamental, technical and quantitative research perspectives with active investment management.
- Style consistency. Our funds strive to remain true to their stated investment objectives to support an overall asset allocation strategy.
- Competitive fees and expenses. We strive to provide value to our clients by keeping net operating expenses at or below the industry average on most of our products.

Process

Our investment professionals use a robust, multi-step process to create a product suite of well-diversified portfolios that meet a range of investment goals and objectives.

- Portfolio management. Our portfolio managers determine which securities to buy and sell in order to construct well-diversified portfolios within their respective asset class categories, such as small-cap stocks or high-yield bonds.
- Strategic asset allocation. We use sophisticated portfolio optimization strategies based on risk and return expectations, mathematical models and statistical analysis to develop our long-term strategic asset allocation targets.
- Tactical investment decisions. We use our knowledge, experience, and the latest market and economic data to form views and make decisions in an effort to stay on top of ever-changing market conditions.
- Company research. Our analysts perform an intensive review of the companies within their sectors by meeting with management, examining financial statements and assessing each company's competitiveness and long-term prospects.
- Risk management. We strive to keep our funds within certain parameters and guidelines so that the risks remain consistent with each fund's investment objective.

As of Dec. 31, 2022. Includes the Thrivent General Account (which manages surplus and the assets backing our life insurance, fixed annuity and health products), variable subaccount portfolios (primarily connected to variable annuities and variable universal life insurance), funds (including open-end, and exchange traded) and other assets related to our affiliates and other subsidiaries

Economic and Financial Market Review

December 31, 2023

Fourth Quarter 2023 Overview

In the final quarter of the year, inflation resumed its decline toward the Federal Reserve's (Fed) target, and the U.S. economy continued to defy expectations as the job market and consumer remained resilient. The Fed's preferred inflation gauge declined to 3.2% year-over-year in November, while final forecasts called for a real GDP growth rate of 2.4% for the U.S. in 2023.^{1,2} The job market ended the year on a strong note with the U.S. adding 216,000 jobs in December and unemployment staying the same at 3.7%.³ Mortgage rates fell steadily throughout November and December, but remained at their highest level in decades, contributing to subdued home sales. Prices at the pump also fell as oil retreated, ending the year more than 10% lower due to increasing evidence of softening global demand. However, U.S. household debt levels rose to an all-time high of \$17.29 trillion as consumers increased their credit card borrowing.⁴

As the quarter progressed, investors began to contemplate the possibility that the Fed—which had raised rates higher and faster than it had in decades—might have successfully steered the U.S. economy to a soft landing. Although Fed policymakers kept the federal funds target rate unchanged at 5.25%-5.50% throughout the quarter, they surprised markets with a dovish pivot in December, signaling three rate cuts in 2024. Investors quickly shifted from their higher-for-longer angst to pricing in more and faster rate cuts for the coming year.

Treasury bond yields surged through October but then fell sharply throughout November and December, marking the biggest two-month drop since 2008's global financial crisis. The yield on the benchmark 10-year Treasury reached nearly 5% in October before declining quickly to end the year where it began at 3.88%. The sharp drop in yields eased pressure on households, housing markets, companies, and governments that had been facing the highest borrowing costs in years. It has now been over a year since the Treasury yield curve first inverted (with short rates higher than long rates), which typically signals a recession.

Equities Review

Prospects of an economic soft landing led equity markets on a record-breaking bull run in the final nine weeks of 2023 with major U.S. indexes posting double-digit gains for the quarter and year. Mega-cap technology and artificial intelligence-related stocks dominated the market led by the so-called Magnificent Seven (Alphabet, Amazon, Apple, Meta, Microsoft, Nvidia, and Tesla). As a result, the tech-heavy Nasdaq Composite was the year's clear winner, gaining 13.84% during the quarter and a whopping 44.70% during 2023. However, the index remains well below its all-time high from 2021, indicating how far the technology sector still needs to recover from its 2022 sell off. The bellwether S&P 500® Index stopped just short of its record high in December, gaining 11.69% for the quarter with 10 of 11 sectors in positive territory. Six sectors posted double-digit gains led by Real Estate, Information Technology, and Financials, while only Energy lagged in the red, driven by falling oil prices. For the year, the S&P 500 advanced 26.29%. Small-cap stocks reversed the year's earlier trend and outpaced large caps during the fourth quarter while still trailing significantly for the year. The small-cap-focused Russell 2000 Index returned 14.03% for the quarter, bringing its year-to-date return to 16.93%.

International equities also advanced strongly during the quarter with the MSCI EAFE Index, which tracks developed market stocks outside the U.S., gaining 10.42% and ending the year on a positive note with a return of 18.24%. Despite a contraction in the eurozone's economy, European stocks outperformed on the back of favorable inflation data as investors bet the European Central Bank would cut rates sooner and more aggressively in 2024 than its hawkish tone suggested. The Japanese stock market also produced its strongest year in a decade, driven by the Tokyo Stock Exchange's push for reforms and renewed interest from foreign investors. Emerging market (EM) stocks continued to lag developed market stocks dragged down by China, one of the only markets in negative territory for the quarter and year. China's economy—the world's second-largest—has continued to disappoint as the country faces a widespread real estate crisis, weak consumer spending, and high youth unemployment. The MSCI Emerging Markets Index returned 7.93% for the quarter and 10.27% for the year.

Fixed-Income Review

Fueled by expectations of rate cuts in 2024, bond prices rallied in the final weeks of the year, saving the fixed-income market from a third straight year of negative returns. The sharp drop in U.S. Treasury yields, which move inversely to bond prices, propelled all fixed-income asset classes to post positive total returns for the quarter. The broad market advanced 6.82% during the quarter as measured by the Bloomberg US Aggregate Bond Index, which tracks the performance of U.S. investment grade bonds, bringing its annual total return to 5.53%. Investment-grade corporate bonds performed best during the quarter as the combination of the dovish Fed, strong demand for yield, and light issuance in December drove credit spreads back to their tightest level of the year. Over the full-year period, however, riskier asset classes prevailed led by high-yield corporate bonds and leveraged loans, which produced annual returns of around 13%, followed by preferred securities and EM debt, which advanced more than 9%.⁵

*Number of Peer Funds is the same for Overall and 3-year periods.

¹ The Adviser has contractually agreed, for as long as the current fee structure is in place, to waive certain investment advisory fees associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

² The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees and/or reimburse certain expenses associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

Methodology: The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance.

- The top 10% of products in each product category receive 5 stars.
- The next 22.5% receive 4 stars.

- The next 35% receive 3 stars.
- The next 22.5% receive 2 stars.
- And the bottom 10% receive 1 star.

The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

A high rating does not necessarily imply that a fund had the best total performance or that the fund achieved positive results for that period. Morningstar rating is for the named share class only; other classes may have different performance characteristics. Please see the Performance section on [thriventfunds.com](https://www.thriventfunds.com) for results as of the most recent month- and quarter-end.

The performance of some Thrivent mutual funds have benefited from fee waivers in effect. If these waivers had not been in effect, performance would have been lower for those funds. Refer to the Fees & Expenses table in the prospectus for current waiver information.

Thrivent Aggressive Allocation Fund

Inception Date Jun. 30, 2005 **Ticker** TAAAX **Total Fund Assets** \$2.31 billion **Expense Ratio** Gross: 1.36% Net: 1.17%*

Fund Description

This fund, the most aggressive in Thrivent's suite of Asset Allocation Funds, is designed for investors with a long-term time horizon and higher risk tolerance. The Fund is globally diversified across major equity and fixed income sectors and styles. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

Investment Strategy/Process

The Fund has a long-term target allocation of 95% equity securities and 5% fixed income. The Fund's asset allocation strategy starts with the construction of a model that sets the long-term target allocations for the broad asset classes of equity and fixed income. Next, the target weightings for sub-classes are determined. Equity sub-classes are often based on market capitalization (large, mid, and small), investment style (such as growth and value), and economic sector. Fixed income sub-classes may be based on maturity, duration, security type or credit rating. The Fund may invest in foreign securities, including emerging markets. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sub-classes based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees and/or reimburse certain expenses associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus. Prior to Feb. 29, 2016, the maximum sales charge for the fund was 5.50%; however, the prior rate is not reflected for periods that began prior to that date.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Aggressive Allocation Fund seeks long-term capital growth.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

S&P 500® Index is a market-cap weighted index that represents the average performance of a group of 500 large-capitalization stocks.

MSCI All Country World Index ex-USA - USD Net Returns measures equity market performance in global developed and emerging markets outside of the US.

Bloomberg US Aggregate Bond Index measures the performance of U.S. investment grade bonds.

Fund Management & Experience

Stephen Lowe, CFA—Industry: 1996, Fund: 2016;
David Royal—Industry: 1997, Fund: 2018; David Spangler, CFA—Industry: 1989, Fund: 2019

Risks: The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, market cap groups, investment styles, and issuers. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. The use of quantitative investing techniques also involves risks. These and other risks are described in the prospectus.

Thrivent Moderately Aggressive Allocation Fund

Inception Date Jun. 30, 2005 **Ticker** TMAAX **Total Fund Assets** \$3.99 billion **Expense Ratio** Gross: 1.32% Net: 1.09%*

Fund Description

This fund, the second-most aggressive option in Thrivent's suite of Asset Allocation Funds, is designed for investors with a long-term time horizon and moderately high risk tolerance. The Fund is globally diversified across all major equity and fixed income sectors and styles. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

Investment Strategy/Process

The Fund has a long-term target allocation of 80% equity securities and 20% fixed income. The Fund's asset allocation strategy starts with the construction of a model that sets the long-term target allocations for the broad asset classes of equity and fixed income. Next, the target weightings for sub-classes are determined. Equity sub-classes are often based on market capitalization (large, mid, and small), investment style (such as growth and value), and economic sector. Fixed income sub-classes may be based on maturity, duration, security type, or credit rating. The Fund may invest in foreign securities, including emerging markets. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sub-classes based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

Fund Management & Experience

Stephen Lowe, CFA—Industry: 1996, Fund: 2016;
David Royal—Industry: 1997, Fund: 2018; David Spangler, CFA—Industry: 1989, Fund: 2019

Risks: The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, market cap groups, investment styles, and issuers. The Adviser is also subject to actual or potential conflicts of interest. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The use of derivatives such as futures involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. The use of quantitative investing techniques also involves risks. These and other risks are described in the prospectus.

Thrivent Moderate Allocation Fund

Inception Date Jun. 30, 2005 **Ticker** THMAX **Total Fund Assets** \$3.46 billion **Expense Ratio** Gross: 1.22% Net: 1.03%*

Fund Description

This fund, the “mid-point” risk option among Thrivent’s suite of Asset Allocation Funds, is designed for investors with a medium to long-term time horizon and a moderate risk tolerance. The Fund is globally diversified across all major equity and fixed income sectors. It’s actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

Investment Strategy/Process

The Fund has a long-term target allocation of 65% equity securities and 35% fixed income. The Fund’s asset allocation strategy starts with the construction of a model that sets the long-term target allocations for the broad asset classes of equity and fixed income. Next, the target weightings for sub-classes are determined. Equity sub-classes are often based on market capitalization (large, mid, and small), investment style (such as growth and value), and economic sector. Fixed income sub-classes may be based on maturity, duration, security type or credit rating. The Fund may invest in foreign securities, including emerging markets. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sub-classes based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor’s shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees and/or reimburse certain expenses associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

Prior to Feb. 29, 2016, the maximum sales charge for the fund was 5.50%; however, the prior rate is not reflected for periods that began prior to that date.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Moderate Allocation Fund seeks long-term capital growth while providing reasonable stability of principal.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Thrivent Moderately Conservative Allocation Fund

Inception Date Jun. 30, 2005 **Ticker** TCAAX **Total Fund Assets** \$1.10 billion **Expense Ratio** Gross: 1.15% Net: 1.01%*

Fund Description

This fund, the most conservative option in Thrivent's suite of Asset Allocation Funds, is designed for investors with a medium to long-term horizon and a moderately conservative risk tolerance. The Fund is globally diversified across all major equity and fixed income sectors and styles. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

Investment Strategy/Process

The Fund has a long-term target allocation of 43% equity securities and 57% fixed income. The Fund's asset allocation strategy starts with the construction of a model that sets the long-term target allocations for the broad asset classes of equity and fixed income. Next, the target weightings for sub-classes are determined. Equity sub-classes are often based on market capitalization (large, mid, and small), investment style (such as growth and value), and economic sector. Fixed income sub-classes may be based on maturity, duration, security type, or credit rating. The Fund may invest in foreign securities, including emerging markets. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sub-classes based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

Investment Objective

Thrivent Moderately Conservative Allocation Fund seeks long-term capital growth while providing reasonable stability of principal.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

S&P 500® Index is a market-cap weighted index that represents the average performance of a group of 500 large-capitalization stocks.

Bloomberg US Aggregate Bond Index measures the performance of U.S. investment grade bonds.

MSCI All Country World Index ex-USA - USD Net Returns measures equity market performance in global developed and emerging markets outside of the US.

Fund Management & Experience

Stephen Lowe, CFA—Industry: 1996, Fund: 2016; David Royal—Industry: 1997, Fund: 2018; David Spangler, CFA—Industry: 1989, Fund: 2019

Risks: The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, market cap groups, investment styles, and issuers. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives such as futures involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. U.S. Government securities may not be fully guaranteed by the U.S. Government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. The use of quantitative investing techniques, Leveraged Loans, and mortgage-related and other asset-backed securities also involve additional risks. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. The Fund may engage in active and frequent trading of portfolio securities, which may result in higher transaction costs and higher taxes. When interest rates fall, certain obligations will be paid off more quickly and proceeds may have to be invested in securities with lower yields. These and other risks are described in the prospectus.

Thrivent Balanced Income Plus Fund

Inception Date Dec. 29, 1997 **Ticker** AABFX **Total Fund Assets** \$410.18 million **Expense Ratio** Gross: 1.02% Net: 1.01%*

Fund Description

This fund provides a balanced approach to income and capital appreciation. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments. Approximately half of the portfolio is invested in equity securities to provide potential growth, while the other half of the portfolio is invested in higher-yielding, higher-risk, fixed income securities to generate income. Investments are diversified across sectors in order to manage risk, potentially provide more stability when interest rates rise, and to provide the opportunity for long-term capital growth and income.

Investment Strategy/Process

The Fund has a long-term target allocation of 45% equity securities and 55% fixed income. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sectors based on their views of the market and economy. Individual stocks and bonds are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees and/or reimburse certain expenses associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus. Prior to Feb. 29, 2016, the maximum sales charge for the fund was 5.50%; however, the prior rate is not reflected for periods that began prior to that date.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Balanced Income Plus Fund seeks long-term total return through a balance between income and the potential for long-term capital growth.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Bloomberg Mortgage-Backed Securities Index represents the performance of securities backed by pools of mortgages.

Bloomberg US High Yield Ba/B 2% Issuer Capped Index represents the performance of Ba or B-rated corporate bond market. Issuers are constrained to a maximum 2% weighting.

Morningstar LSTA US Leveraged Loan Index reflects performance of the largest facilities in the leveraged loan market.

Fund Management & Experience

Stephen Lowe, CFA—Industry: 1996, Fund: 2013; David Spangler, CFA—Industry: 1989, Fund: 2019; Theron Whitehorn, CFA—Industry: 2002, Fund: 2021

Risks: The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, market cap groups, investment styles, and issuers. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. Leveraged loans, sovereign debt, and mortgage-related and other asset-backed securities are subject to additional risks. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. The Fund may engage in active and frequent trading of portfolio securities, which may result in higher transaction costs and higher taxes. When interest rates fall, certain obligations will be paid off more quickly and proceeds may have to be invested in securities with lower yields. The use of quantitative investing techniques also involves risk. These and other risks are described in the prospectus.

Thrivent Diversified Income Plus Fund

Inception Date Jan. 08, 1997 **Ticker** AAHYX **Total Fund Assets** \$1.02 billion **Expense Ratio** Gross: 0.95%

Fund Description

This fund looks to provide a steady and dependable income stream along with modest capital appreciation. It invests in higher-yielding, higher-risk, fixed income securities to generate income, and in equities to provide potential growth and income. Investments are diversified across sectors in order to manage risk and potentially provide more stability when interest rates rise. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

Investment Strategy/Process

The Fund has a long-term target allocation of 80% fixed income and 20% equity securities. The portfolio management team actively manages the Fund with overweight and underweight positions in various sectors based on their views of the market and economy. Individual stocks and bonds are analyzed and chosen on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

Thrivent Opportunity Income Plus Fund

Inception Date Jul. 16, 1987 **Ticker** AAINX **Total Fund Assets** \$720.10 million **Expense Ratio** Gross: 0.91%

Fund Description

This fund generates income by investing predominantly in a diversified mix of high-income fixed income securities. It invests primarily in higher-yielding, higher-risk, fixed income securities to generate income, while the equity holdings are generally opportunistic investments. Investments are diversified across sectors in order to manage risk and potentially provide more stability when interest rates rise. The Fund is actively managed and invests in a combination of other funds managed by the Adviser and direct investments in equity and debt instruments.

Investment Strategy/Process

The Fund primarily invests in a broad range of debt securities. The portfolio management team actively manages the Fund with overweight and underweight positions in the various sectors based on their views of the market and economy. Fixed income securities and equity holdings are analyzed and selected on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

Risks: Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. Leveraged loans, sovereign debt, mortgage-related and other asset-backed securities are subject to additional risks. The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, investment styles, and issuers. The Adviser is also subject to actual or potential conflicts of interest. The use of derivatives such as futures involves additional risks. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. The Fund may engage in active and frequent trading of securities, which may result in higher transaction costs and taxes. When interest rates fall, certain obligations will be paid off more quickly and proceeds may have to be invested in lower-yielding securities with lower yields. These and other risks are described in the prospectus.

Thrivent Global Stock Fund

Inception Date Jul. 16, 1987 **Ticker** AALGX **Total Fund Assets** \$1.92 billion **Expense Ratio** Gross: 0.98%

Fund Description

This fund is a well-diversified portfolio of global securities, which may include companies from all countries including the United States. This fund looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in a globally-diversified portfolio that includes a combination of companies across the growth and value spectrums. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market average, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Investment Strategy/Process

The Fund invests at least 80% of its net assets in equity securities of domestic and international companies and invests approximately 40% of net assets in foreign assets under normal market conditions. The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified, global portfolio. The team uses fundamental, quantitative, and technical investment research techniques to identify and purchase financially-sound companies that appear to have strong, long-term growth prospects and capable management teams.

Risks: The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, market cap groups, investment styles, and issuers. The Adviser is also subject to actual or potential conflicts of interest. Large companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. The use of quantitative investing techniques also involves risks. These and other risks are described in the prospectus.

Thrivent International Allocation Fund

Inception Date Feb. 29, 2008 **Ticker** TWAAX **Total Fund Assets** \$785.23 million **Expense Ratio** Gross: 1.34% Net: 1.17%*

Fund Description

This fund is a well-diversified portfolio of international securities, which includes companies outside of the United States. It's designed to provide investors with an all-in-one solution for international equity investing and includes allocations to large, mid and small-cap international companies, across the growth, value, and core investment styles. The Fund also provides exposure to emerging market stocks. Investors should be comfortable with the higher level of volatility that may be associated with international investing.

Investment Strategy/Process

The portfolio management team seeks to achieve its objective by investing primarily in a portfolio of broadly-diversified equity securities of issuers throughout the world. The Fund has a long-term target allocation of approximately 75% international large- and mid-cap companies, 15% international small-cap companies, 7.5% emerging market equity securities, and 2.5% cash and other securities. The investment adviser makes asset allocation decisions among the various asset classes. As of April 30, 2023, Goldman Sachs Asset Management, LP no longer serves as subadviser to the Fund.

Thrivent Large Cap Growth Fund

Inception Date **Ticker** **Total Fund Assets** **Expense Ratio**
Oct. 29, 1999 AAAGX \$2.48 billion Gross: 1.06%

Fund Description

This fund looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in large companies across the growth spectrum. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management, while monitoring risk in the portfolio. Analysts identify securities that they believe may provide strong, long-term, organic growth opportunities, or that are uniquely positioned within the industry. Each analyst uses a proprietary research process, considering the factors and characteristics that are most relevant for each industry. The analyst team's "best ideas" in each sector are presented to the portfolio management team as candidates for the portfolio. The Fund's portfolio managers are responsible for portfolio construction and risk management.

S&P 500® Growth Index measures the performance of the growth stocks in the S&P 500 Index.

Fund Management & Experience

Lauri Brunner—Industry: 1993, Fund: 2018; Jaimin Soni—Industry: 2008, Fund: 2022

Risks: Large companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The Fund's value is influenced by a number of factors, including the performance of the broader market and risks specific to the Fund's asset classes, investment styles, and issuers. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. A non-diversified portfolio is generally more susceptible to the risk that events or developments affecting a particular issuer or industry will significantly affect performance results. Common stocks of companies that rely extensively on technology, science or communications in their product development or operations may be more volatile than the overall stock market and may or may not move in tandem with the overall stock market. These and other risks are described in the prospectus.

Fund Statistics

Statistics shown below are compared to S&P 500[®] Index (represents average performance of 500 large-cap stocks). It is intended to provide a broad comparison to U.S. large-cap stock market, and may not be representative of the Fund's investment strategies and holdings.

Holdings Information

Number of Holdings 53
Turnover Ratio (last 12-months)[†] 47%

Risk/Volatility Measures

Beta (3-year vs. S&P 500[®] Index): A measure of the volatility, or market risk, of an investment compared to the broad U.S. large-cap stock market.

Standard Deviation: Measures risk by showing how much a fund fluctuates relative to its average return over a period of time.

	Fund	S&P 500 ^{®§§}
3 Year	21.50	17.54
5 Year	21.40	18.52
10 Year	17.66	15.19

Equity Characteristics

Market Capitalization is a measure of the size of the companies held in the portfolio, calculated by multiplying a company's total outstanding shares by the stock price.

	Fund	S&P 500 ^{®§§}
Median Mkt Cap	\$122.59 B	\$33.18 B
Weighted Avg Mkt Cap	\$843.35 B	\$721.66 B

Price to Earnings (P/E) Ratio: A valuation ratio of a company's current share price compared to its earnings per-share, calculated by dividing the market value per share by its trailing 12-month earnings.

	Fund	S&P 500 ^{®§§}
P/E Ratio	30.06	24.03

Return on Equity (ROE): A measure of corporate profitability that shows how much net income the companies in the portfolio have generated as a percentage of shareholder equity.

	Fund	S&P 500 ^{®§§}
ROE	19.86%	23.61%

Thrivent Large Cap Value Fund

Inception Date Oct. 29, 1999 **Ticker** AAUTX **Total Fund Assets** \$2.17 billion **Expense Ratio** Gross: 0.85%

Fund Description

This fund looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in large companies across the value spectrum. Value stocks are companies that trade at a lower price compared to the market average, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team also seeks to invest in stocks that they believe are undervalued, which may be because the company is out of favor or has been temporarily overlooked. The team uses fundamental, quantitative and technical investment research techniques in an effort to identify high-quality businesses that are trading at attractive prices, but have good prospects for long-term capital appreciation. Catalysts for improvement may include factors such as improving economic conditions, new industry developments, or a company's plan to improve the business.

Thrivent Mid Cap Stock Fund

Inception Date Jun. 30, 1993 **Ticker** AASCX **Total Fund Assets** \$4.00 billion **Expense Ratio** Gross: 0.97%

Fund Description

This fund looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in a combination of mid-sized companies across the growth and value spectrums. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Mid-sized companies may be more established than small companies but have the opportunity to experience faster growth as they seek to become large-cap companies. However, they typically have greater risk than larger, more-seasoned companies.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management. The Fund invests in a diversified portfolio of growth and value stocks with improving or positive outlooks relative to market expectations. The process begins with idea generation and screening to identify stocks that have certain characteristics. The team uses fundamental, quantitative and technical investment research techniques to seek to identify and purchase mid-sized companies that are in industries with good economic outlooks and that have strong prospects for growth in their sales and earnings. They also seek to identify companies with high-quality management teams and strong financial positions, and monitor risk in an effort to build a well-diversified portfolio.

Investment Objective

Thrivent Mid Cap Stock Fund seeks long-term capital growth.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Russell Midcap® Index measures the performance of U.S. medium-capitalization equities.

S&P MidCap 400® Index represents the average performance of a group of 400 medium capitalization stocks.

Fund Management & Experience

Brian Flanagan, CFA—Industry: 1993, Fund: 2004; Vikram Kaura—Industry: 1999, Fund: 2022; J.P. McKim, CFA—Industry: 2010, Fund: 2022

Risks: Medium-sized companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. The Fund's value is influenced by a number of factors, including the performance of the broader market, and risks specific to the Fund's asset classes, investment styles, and issuers. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. These and other risks are described in the prospectus.

Thrivent Small Cap Stock Fund

Inception Date Jul. 01, 1996 **Ticker** AASMX **Total Fund Assets** \$2.76 billion **Expense Ratio** Gross: 1.05%

Fund Description

This fund looks to provide investors with competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in a combination of small-sized companies across the growth and value spectrums. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market average, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Small-sized companies may have the opportunity to grow more rapidly than larger companies as they potentially emerge from a small to a medium-sized company. However, they typically do not pay significant dividends to shareholders and instead reinvest earnings back into the company. Smaller companies have greater volatility (or more risk) because they are often less seasoned, have narrower product lines, less liquidity, smaller revenues and fewer resources than larger companies.

Investment Strategy/Process

The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental, quantitative and technical investment research techniques to identify and purchase small, financially-sound companies that appear to have strong, long-term growth prospects and capable management teams.

Investment Objective

Thrivent Small Cap Stock Fund seeks long-term capital growth.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Russell 2000® Index measures the performance of U.S. small capitalization equities.

S&P SmallCap 600® Index represents the average performance of a group of 600 small capitalization stocks.

Fund Management & Experience

Matthew Finn, CFA—Industry: 1985, Fund: 2013;
James Tinucci, CFA—Industry: 2008, Fund: 2015;
Katelyn Young, CPA—Industry: 2010, Fund: 2023

Risks: Smaller, less seasoned companies often have greater price volatility, lower trading volume, and less liquidity than larger, more established companies. The Fund's value is influenced by a number of factors, including the performance of the broader market, and risks specific to the Fund's asset classes, investment styles, and issuers. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. These and other risks are described in the prospectus.

Thrivent Government Bond Fund

Inception Date Feb. 26, 2010 **Ticker** TBFAX **Total Fund Assets** \$86.07 million **Expense Ratio** Gross: 1.18% Net: 0.75%*

Fund Description

This fund invests primarily in U.S. government bonds, which may include debt instruments issued or guaranteed by the U.S. government and its agencies or instrumentalities. This includes U.S. Treasuries, Treasury Inflation Protected Securities (TIPS), U.S. Government Agency debt, and mortgage-backed securities that are issued or guaranteed by the Government National Mortgage Association (GNMA), the Federal National Mortgage Association (FNMA) or the Federal Home Loan Mortgage Corporation (FHLMC). The Fund may hold securities of any maturity. Government bonds have a low correlation to equities and may outperform stocks and corporate bonds when these markets are declining and investors tend to become more risk averse. As a result, an allocation to government bonds may help diversify an investor's overall portfolio. The Fund may also utilize derivatives for investment exposure or hedging purposes.

Investment Strategy/Process

The portfolio management team uses fundamental, quantitative and technical investment research techniques to determine which debt obligations to buy and sell. The portfolio managers are responsible for portfolio construction and risk management, and use duration and yield curve management strategies in an effort to increase total return potential and manage risk.

Growth of \$10,000 and Calendar Year Performance (%)

Class A shares of Thrivent Government Bond Fund are closed to all purchases and exchanges into the Fund, other than the reinvestment of dividends by current shareholders in the Fund.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees and/or reimburse certain expenses associated with the Fund. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Government Bond Fund seeks total return, consistent with preservation of capital.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Bloomberg US Treasury Index measures the performance of the public debt obligations of the U.S. Treasury with remaining maturities of one year or more.

Bloomberg US Agency Index measures the performance of the publicly issued debt of U.S. Government agencies (e.g. Fannie Mae, Freddie Mac) and the Federal Home Loan Bank System.

Fund Management & Experience

Kent White, CFA—Industry: 1999, Fund: 2023; Jon-Paul (JP) Gagne—Industry: 2004, Fund: 2022

Risks: U.S. Government securities may not be fully guaranteed by the U.S. Government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. The value of mortgage-related and other asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. Inflation-linked debt securities, such as TIPS, are subject to the effects of changes in market interest rates caused by factors other than inflation (real interest rates). The use of derivatives (such as futures) involves additional risks and transaction costs. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Fund may engage in active and frequent trading of portfolio securities, which may result in higher transaction costs and higher taxes. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. Sovereign debt securities are subject to additional risks. These and other risks are described in the prospectus.

Thrivent High Yield Fund

Inception Date Apr. 03, 1987
 ticker LBHYX
Total Fund Assets \$681.78 million
Expense Ratio Gross: 0.81%

Fund Description

This fund invests primarily in corporate bonds that are either unrated or rated as "below investment-grade," commonly known as "junk bonds." Credit rating agencies evaluate bond issuers and assign ratings based on their ability to pay interest and repay principal as scheduled. Bond issuers that are considered to have a greater risk of defaulting on payments pay higher interest rates to compensate investors for the additional risk. The Fund is managed as a high yield portfolio that primarily invests in bonds in the top three ratings of the high yield credit quality spectrum. The high yield sector may provide portfolio diversification benefits because it has a low correlation to other sectors of the fixed income market and less sensitivity to interest rate risk, but is more risky than investment-grade debt. The Fund may also utilize derivatives to manage duration, or interest rate risk.

Investment Strategy/Process

The portfolio management team seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental, quantitative and technical investment research techniques to determine which securities to buy and sell. Through careful credit research, the team strives to identify U.S. companies that will have adequate cash flows to meet their principal and interest obligations. The team also considers the macro-economic environment and performs an ongoing assessment of relative value and risk. Based on this market outlook, the Fund may take overweight and underweight positions in various industries and may reallocate across the higher and lower-quality segments of the high yield market.

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent High Yield Fund seeks high current income, and secondarily growth of capital.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Bloomberg US Corporate High Yield Bond Index measures the performance of fixed-rate non-investment grade bonds.

Fund Management & Experience

Paul Ocenasek, CFA—Industry: 1987, Fund: 1997;
 Paul Tommerdahl, CFA—Industry: 2008, Fund: 2023

Risks: High yield securities are subject to increased credit risk as well as liquidity risk. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. Convertible securities are subject to additional risks and may also be forced to convert at an inopportune time which may decrease returns. The use of derivatives such as futures involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. Leveraged loans also known as bank loans are subject to numerous risks. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. When interest rates fall, certain obligations will be paid off more quickly and proceeds may have to be invested in securities with lower yields. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. These and other risks are described in the prospectus.

Thrivent Income Fund

Inception Date Jun. 01, 1972 **Ticker** LUBIX **Total Fund Assets** \$975.83 million **Expense Ratio** Gross: 0.75%

Fund Description

This fund invests primarily in investment-grade corporate bonds, government bonds, asset-backed securities, and mortgage-backed securities. The Fund may also invest a portion of its assets in high yield bonds, leveraged loans and preferred stock, and may opportunistically invest in foreign issuers (including emerging market issuers), non-agency mortgage-backed securities and commercial mortgage-backed securities. The Fund typically has its largest allocation in BBB-rated bonds, which are the lowest-tier of investment grade bonds. The Fund uses derivatives in order to manage the Fund's duration, or interest rate risk.

Investment Strategy/Process

The portfolio management team seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental, quantitative and technical investment research techniques to determine which securities to buy and sell. The Fund's investment adviser may purchase bonds of any maturity and generally focuses on U.S. companies that it believes are financially sound and have strong cash flows and earnings. The team also considers the macro-economic environment and performs an ongoing assessment of relative value and risk. Based on this market outlook, the Fund may take overweight and underweight positions in various sectors and industries and may reallocate across the higher and lower-quality segments of the bond market. The analysts perform research and provide buy/sell recommendations while the portfolio manager is responsible for portfolio construction and risk management.

Bloomberg US Corporate Bond Index measures the investment grade, fixed rate, US taxable corporate bond market.

Fund Management & Experience

Kent White, CFA—Industry: 1999, Fund: 2017; Cortney Swensen, CFA—Industry: 2005, Fund: 2023

Risks: Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. High yield securities are subject to increased credit risk as well as liquidity risk. The use of derivatives such as futures involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. To the extent that the financials sector continues to represent a significant portion of the Fund, The Fund will be sensitive to changes in, and its performance may depend to a greater extent on, factors impacting this sector. U.S. Government securities may not be fully guaranteed by the U.S. Government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The Fund's value may be affected by factors specific to an issuer within the Fund. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The value of mortgage-related and other asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. These and other risks are described in the prospectus.

Thrivent Limited Maturity Bond Fund

Inception Date Oct. 29, 1999 **Ticker** LBLAX **Total Fund Assets** \$1.29 billion **Expense Ratio** Gross: 0.57%

Fund Description

This fund invests primarily in investment-grade corporate bonds, government bonds, asset-backed securities, mortgage-backed securities and collateralized debt obligations. The Fund may also invest a portion of assets in foreign securities. The dollar-weighted average effective maturity for the Fund is expected to be between one and five years. The Fund's shorter duration makes it less sensitive to interest rate changes than some longer-duration funds. As a result, the Fund may be appropriate for an investor who is seeking the opportunity to generate a modest level of income (with some investment risk), but with less interest rate risk and a lower return potential than most longer-maturity bond funds.

Investment Strategy/Process

The portfolio management team seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental, quantitative and technical investment research techniques to determine which debt securities to buy and sell. The Fund's investment adviser generally focuses on issuers that it believes are financially sound and that have strong cash flows and earnings. The Fund may use an interest-rate management technique that includes the purchase and sale of U.S. Treasury securities and related futures contracts for the purpose of managing the duration of the Fund.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Limited Maturity Bond Fund seeks a high level of current income consistent with stability of principal.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Bloomberg Government/Credit 1-3 Year Bond Index measures the performance of U.S. government bonds with maturities of 1-3 years.

Fund Management & Experience

Cortney Swensen, CFA—Industry: 2005, Fund: 2020; Jon-Paul (JP) Gagne—Industry: 2004, Fund: 2021

Risks: U.S. Government securities may not be fully guaranteed by the U.S. Government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. The value of mortgage-related and other asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. In addition to typical risks associated with fixed income and asset-backed securities, collateralized debt obligations are subject to additional risks. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The use of futures contracts involves additional risks such as a loss in value in the underlying instrument, which could decrease the Fund's value. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The Fund's value may be affected by factors specific to an issuer within the Fund. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. These and other risks are described in the prospectus.

Thrivent Money Market Fund

Inception Date Mar. 10, 1988 **Ticker** AMMXX **Total Fund Assets** \$2.21 billion **Expense Ratio** Gross: 0.50% Net: 0.45%*

Fund Description

This fund is managed as a government money market fund according to rules established by the Securities and Exchange Commission (SEC) that are designed so that the Fund may maintain a stable, \$1.00 share price. Those rules generally require the Fund to invest only in high quality securities that are denominated in U.S. dollars and have short remaining maturities. The Fund is also required to maintain a dollar-weighted average maturity of not more than 60 days and a dollar-weighted average life of not more than 120 days.

Investment Strategy/Process

The portfolio management team seeks to produce current income while maintaining liquidity by investing at least 99.5% of its total assets in U.S. government securities, cash and repurchase agreements collateralized fully by government securities or cash. The Adviser invests in securities by selecting from the available supply of short-term government securities based on its interest rate outlook and analysis of quantitative and technical factors. Although the Fund frequently holds securities until maturity, the Adviser may sell securities to increase liquidity.

Growth of \$10,000 and Calendar Year Performance (%)

□ Calendar Year Total Returns (CYTR) - without charges, fees, or expenses
■ Total Market Value (reflects reinvestment of all dividends and capital gains) - \$10,985

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

*The Adviser has contractually agreed, for a period of one year from the date of the most recent prospectus, to waive certain fees associated with the Fund. However, this may be terminated before the indicated termination date upon the mutual agreement between the Trustees of the Fund and the Adviser. If not waived, returns would have been lower. Refer to the Fees & Expenses table in the prospectus.

Investment Objective

Thrivent Money Market Fund seeks a high level of current income, while maintaining liquidity and a constant net asset value of \$1.00 per share.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Fund Management & Experience

William Stouten—Industry: 1993, Fund: 2003

You could lose money by investing in the Thrivent Money Market Fund. Although the Thrivent Money Market Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Thrivent Money Market Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Thrivent Money Market Fund's sponsor has no legal obligation to provide financial support to the Thrivent Money Market Fund, and you should not expect that the sponsor will provide financial support to the Thrivent Money Market Fund at any time.

Risks: The Fund invests at least 99.5% of its assets in government securities, cash and repurchase agreements collateralized fully by government securities or cash. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so and you could lose money. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund sponsor has no legal obligation to provide financial support to the Fund and you should not expect that the sponsor will provide financial support to the Fund at any time. U.S. Government securities may not be fully guaranteed by the U.S. Government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. The Fund invests in other funds; therefore, the Fund is dependent upon the performance of the other funds and is subject to the risks, additional fees and expenses of the other funds. If the seller of a repurchase agreement defaults, the Fund may incur losses. These and other risks are described in the prospectus.

Thrivent Municipal Bond Fund

Inception Date Dec. 03, 1976 **Ticker** AAMBX **Total Fund Assets** \$1.27 billion **Expense Ratio** Gross: 0.74%

Fund Description

This fund invests in a nationally-diversified portfolio of predominantly investment grade municipal bonds. A municipal bond is a debt security issued by a city, county or state government to finance its capital expenditures. These bonds often finance public projects such as schools, roads, bridges, sewers or hospitals. Municipal bonds are exempt from federal income taxes. The Fund generally holds investment-grade bonds and unrated bonds that the Fund's investment adviser determines to be of comparable quality. The Fund may invest in lower quality bonds that may have a higher yield but more credit risk and longer duration than investment-grade bonds. It invests in both general obligation bonds that are backed by the taxing authority of the issuer, and revenue bonds that are repaid from the revenues generated by the project. Municipal bonds typically have a longer duration and more interest-rate risk than other corporate bonds.

Investment Strategy/Process

The portfolio management team seeks to add value through security selection and active management, and monitors risk in an effort to build a well-diversified portfolio. The team uses fundamental, quantitative and technical investment research techniques to determine which securities to buy and sell. Through rigorous credit research, the analysts seek to identify high-quality municipal bonds that are issued by financially-sound entities with strong fundamentals and adequate cash flows to meet their principal and interest obligations. The team may also invest in Treasury futures contracts to manage interest rate risk. The portfolio manager is responsible for portfolio construction and risk management and seeks to invest with a very prudent level of risk. The Fund's holdings are well-diversified both geographically and across sectors.

Growth of \$10,000 and Calendar Year Performance (%)

- Calendar Year Total Returns (CYTR) - without charges, fees, or expenses
- Total Market Value (reflects reinvestment of all dividends and capital gains) - \$12,859

All data represents past performance. Past performance does not guarantee future results. The investment return and principal value of the investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be lower or higher than the performance data quoted. Call 800-847-4836 or visit thriventfunds.com for performance results current to the most recent month-end.

Performance shown assumes the reinvestment of all dividends and capital gains. Other share class performance may vary due to differences in expenses.

**The Morningstar average represents the average total return annualized when greater than one year for all reported funds in the category. Morningstar averages do not include sales charges/fees. If included, returns would have been lower.

Investment Objective

Thrivent Municipal Bond Fund seeks a high level of current income exempt from federal income taxes, consistent with capital preservation.

Minimum Investment

Non-retirement: \$2,000; IRA or tax-deferred: \$1,000; Subsequent: \$50

Benchmark(s)

Any indexes shown are unmanaged and do not reflect the typical costs of investing. Investors cannot invest directly in an index.

Bloomberg Municipal Bond Index is a market value-weighted index of investment grade municipal bonds with maturities of one year or more.

Fund Management & Experience

Johan Åkesson, CFA—Industry: 1993, Fund: 2022; Stephanie Woepel—Industry: 2004, Fund: 2023

Risks: Municipal bonds may be affected by political or economic conditions at the state, regional or federal level. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. Changes in federal income tax laws or rates may affect both the net asset value of the Fund and the taxable equivalent interest generated from securities in the Fund. Some issues may be subject to state and local taxes and/or the federal and state alternative minimum tax (AMT). The use of futures contracts involves additional risks such as a loss in value in the underlying instrument, which could decrease the Fund's value. High yield securities are subject to increased credit risk as well as liquidity risk. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. Securities markets generally tend to move in cycles with periods when security prices rise and periods when security prices decline. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. These and other risks are described in the prospectus.
