

Thrivent Diversified Income Plus Fund

Inception Date Jan. 08, 1997 **Ticker** AAHYX **Total Fund Assets** \$1.19 billion **Expense Ratio** Gross: 0.96%

Fund Description

This fund looks to provide a steady and dependable income stream along with modest capital appreciation. It invests in higher-yielding, higher-risk, fixed-income securities to generate income, and in equities to provide potential growth and income. Investments are diversified across sectors in order to manage risk and potentially provide more stability when interest rates rise. The Fund is actively managed and invests in a combination of direct investments in stocks, bonds, and derivatives and other funds managed by the Adviser or an affiliate.

Investment Strategy/Process

The Fund has a long-term target allocation of 75% fixed income and 25% equity securities. The portfolio management team actively manages the Fund with overweight and underweight positions in various sectors based on their views of the market and economy. Individual stocks and bonds are analyzed and chosen on an ongoing basis. The Fund is regularly rebalanced to ensure that the holdings are within appropriate ranges.

Growth of \$10,000 and Calendar Year Performance (%)

■ Calendar Year Total Returns (CYTR)
■ Total Market Value (assumes the reinvestment of all dividends and capital gains) - \$18,052
■ Current Value of Reinvested Dividends and Capital Gains - \$5,749

Risks: The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, investment styles, and issuers. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer not pay its debt. When interest rates fall, certain obligations will be paid off more quickly and proceeds may have to be invested in securities with lower yields. Leveraged loans, preferred securities, sovereign debt, and mortgage-related and other asset-backed securities are subject to additional risks. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. The London Interbank Offered Rate (LIBOR) is being phased out, which brings uncertainty to instruments tied to it. Markets may also be impacted by domestic or global events, including public health threats, terrorism, natural disasters or similar events. The Fund invests in other funds managed by the Adviser or an affiliate and in directly-held equity and debt instruments. The Fund is dependent upon the performance of the other funds and is subject to the risks and additional fees and expenses of the other funds. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. The Adviser is also subject to actual or potential conflicts of interest. The use of quantitative investing techniques and derivatives such as futures also involve risks. The Fund may engage in active and frequent trading of portfolio securities, which may result in higher transaction costs and higher taxes. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. These and other risks are described in the prospectus.
