

# Thrivent Global Stock Fund

**Inception Date** Dec. 29, 1997    **Ticker** IILGX    **Total Fund Assets** \$2.15 billion    **Expense Ratio** Gross: 0.66%

## Fund Description

This fund is a well-diversified portfolio of global securities, which includes companies from all countries including the United States. This portfolio looks to provide investors with consistent, competitive performance through favorable stock selection while monitoring risk. The Fund typically invests in a globally-diversified portfolio that includes a combination of both large-cap "growth" stocks and "value" stocks. Growth stocks are companies whose earnings are expected to grow at an above-average rate relative to the market. Value stocks are companies that trade at a lower price compared to the market average, as measured by valuation ratios that compare the stock's price to the company's earnings and growth trends. Large companies are generally considered to be more stable, but may not have the fast growth potential of smaller companies or the ability to respond as quickly to competitive challenges and changing market conditions.

## Investment Strategy/Process

The Fund invests at least 80% of its net assets in equity securities of domestic and international companies and invests at least 40% of net assets in foreign assets under normal market conditions. The portfolio management team seeks to add value through stock selection and active management, and monitors risk in an effort to build a well-diversified, global portfolio. The team uses fundamental, quantitative, and technical investment research techniques to identify and purchase financially-sound companies that appear to have strong, long-term growth prospects and capable management teams.

## Growth of \$10,000 and Calendar Year Performance (%)

- Calendar Year Total Returns (CYTR)
- Total Market Value (assumes the reinvestment of all dividends and capital gains) - \$27,891
- Current Value of Reinvested Dividends and Capital Gains - \$14,391

Other share class performance may vary due to differences in fees and expenses.

## Average Annualized Returns (%)

Periods less than one year are not annualized

	3 Month	YTD	1 Year	3 Year	5 Year	10 Year	Since Incept

Risks: Large companies may be unable to respond quickly to new competitive challenges and may not be able to attain a high growth rate. The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Portfolio's asset classes, market cap groups, investment styles, and issuers. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. Markets may also be impacted by domestic or global events, including public health threats, terrorism, natural disasters or similar events. The use of quantitative investing techniques and derivatives such as futures also involve risks. The Adviser's assessment of investments may prove incorrect, resulting in losses or poor performance. These and other risks are described in the prospectus.
