

Thrivent International Allocation Fund

Inception Date Feb. 29, 2008 **Ticker** TWAIX **Total Fund Assets** \$789.74 million **Expense Ratio** Gross: 0.82%

Fund Description

This fund is a well-diversified portfolio of international securities, which includes companies outside of the United States. It's designed to provide investors with an all-in-one solution for international equity investing and includes allocations to large, mid and small-cap international companies, across the growth, value, and core investment styles. The Fund also provides exposure to emerging market stocks. Investors should be comfortable with the higher level of volatility that may be associated with international investing.

Investment Strategy/Process

The portfolio management team seeks to achieve its objective by investing primarily in a portfolio of broadly-diversified equity securities of issuers throughout the world. The Fund has a long-term target allocation of approximately 75% international large- and mid-cap companies, 15% international small-cap companies, 7.5% emerging market equity securities, and 2.5% cash and other securities. The investment adviser makes asset allocation decisions among the various asset classes and manages all of the Fund other than a portion of the international small-cap company allocation, which is sub-advised by Goldman Sachs Asset Management.

Risks: Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. The Fund's value is influenced by a number of factors, including the performance of the broader market, the effectiveness of the Adviser's allocation strategy, and risks specific to the Fund's asset classes, market cap groups, investment styles, and issuers. Markets may also be impacted by domestic or global events, including public health threats, terrorism, natural disasters or similar events. The use of quantitative investing techniques and derivatives such as futures also involve risks. The Adviser's assessment of investments and ESG considerations may prove incorrect, resulting in losses or poor performance. The investment style employed by the Subadviser may not be complementary to that of the Adviser. The Fund may engage in active and frequent trading of portfolio securities, which may result in higher transaction costs and higher taxes. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. These and other risks are described in the prospectus.
