Fund Description

This fund is managed as a government money market fund according to rules established by the Securities and Exchange Commission (SEC) that are designed so that the Fund may maintain a stable, \$1.00 share price. Those rules generally require the Fund to invest only in high quality securities that are denominated in U.S. dollars and have short remaining maturities. The Fund is also required to maintain a dollar-weighted average maturity of not more than 60 days and a dollar-weighted average life of not more than 120 days.

Investment Strategy/Process

The portfolio management team seeks to produce current income while maintaining liquidity by investing at least 99.5% of its total assets in U.S. government securities, cash and repurchase agreements collateralized fully by government securities or cash. The Advisor invests in securities by selecting from the available supply of short-term government securities based on its interest rate outlook and analysis of quantitative and technical factors. Although the Fund frequently holds securities until maturity, the Advisor may sell securities to increase liquidity.

Risks:

You could lose money by investing in the Thrivent Money Market Fund. Although the Thrivent Money Market Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. An investment in the Thrivent Money Market Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Thrivent Money Market Fund's sponsor has no legal obligation to provide financial support to the Thrivent Money Market Fund, and you should not expect that the sponsor will provide financial support to the Thrivent Money Market Fund at any time. These and other risks are described in the prospectus.

The Fund invests at least 99.5% of its assets in government securities, cash and repurchase agreements collateralized fully by government securities or cash. You could lose money by investing in the Fund. The value of U.S. government securities may be affected by changes in the credit rating of the U.S. government and may not be fully guaranteed by the U.S. government. A weak economy, strong equity markets, or changes to the Federal Reserve's monetary policies may cause short-term interest rates to increase and affect the Fund's ability to maintain a stable share price. Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer not pay its debt. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. These and other risks are described in the prospectus.

²**Thrivent Money Market Fund Yield:** 7-Day Current Yield is the yield generated by an investment in the Fund over a 7-day period ended on the date of the calculation and expressed as an annual percentage. 7-Day Effective Yield is calculated similarly to the 7-day Current Yield, except that the effective yield assumes that income earned from the Fund's investments is reinvested and generating additional income. It is expressed as an annual percentage. The yield quotation more closely reflects the current earnings of the Thrivent Money Market Fund than the total return quotation.

³The 7-Day Yield before the reimbursement of fees is the yield without any fee reimbursement applied.

⁴NAV = Net Asset Value. Class S shares carry no sales charge.

⁵Average of the daily NAV values for the trailing 12-months.
