Thrivent Income Fund

Ticker LBIIX (Class S), LUBIX (Class A)
Inception Oct. 31, 1997 (Class S), June 1, 1972 (Class A)
Objective The Fund seeks high current income while preserving principal. The Fund's secondary investment objective is to obtain long-term growth of capital in order to maintain investors' purchasing power.

Fund key points

Thrivent Income Fund is designed to provide higher levels of income while preserving principal by investing primarily in investment-grade corporate bonds.

Focused on corporate bonds with the ability to tactically allocate to other sectors

The Fund invests primarily in investment-grade corporate bonds across the ratings spectrum, and will aim to have a large portion invested in BBB-rated bonds to increase yield. The portfolio managers can invest outside of corporates as well, emphasizing sectors that exhibit attractive relative value, and may at times have a substantial allocation to non-investment grade bonds.

Collaborative process helps portfolio managers make decisions

In managing the Fund, the portfolio managers actively collaborate with other Thrivent Asset Management, LLC investment professionals for both top-down and bottom-up analysis. There is ongoing dialogue with other portfolio managers to understand the dynamics driving relative valuations. The portfolio managers leverage the expertise of our team of research analysts in choosing individual securities for the Fund.

Portfolio construction process emphasizes credit risk

While some of the decision-making process is driven by interest-rate risk analysis, in which the team seeks to understand where interest rates might be headed and the impact on the Fund, the majority is driven by a focus on credit risk. The goal of the process is to construct a portfolio that takes on no more risk than necessary for the desired level of yield.

Investment process

Portfolio construction

- Focused on corporates and employs a relative value approach
- Portfolio managers may tactically allocate to other sectors and may use derivatives for positioning

Sell discipline

- Largely driven by relative value analysis

Security selection

- Fundamental research process supported by team of experienced research analysts
- Focused on identifying companies that are de-leveraging and expected to have strong free cash flow throughout the economic cycle

Industry since: 2005
Thrivent since: 2011
Fund since: 2023

“Our goal of providing income for shareholders is supported by a truly collaborative process highlighting the strengths of Thrivent.”

Investing through the credit cycle

Expansion
- Sustainable growth period
- Leverage increases as M&A, capex, and share buybacks increase
- Risk appetite high
- Credit spreads at cycle tights

Move up in quality: reduce BBB and HY exposure; increase Treasuries and securitized asset exposure

Downturn
- Stalled or negative economic growth
- Corporate earnings deteriorate quickly
- Credit spreads widen
- Default rates rise

Remain defensive, but begin to look for opportunities to add risk

Repair
- Economy and corporate earnings bottom
- Default rates peak
- Leverage reduced by cost cutting, asset sales, equity issuance
- Credit spreads begin to tighten

Add risk: Increase HY and BBB exposure, reduce Treasuries and securitized assets

Recovery
- Economic and corporate earnings growth returns
- Corporate leverage improves
- Disciplined corporate spending behavior
- Tightening credit spreads

Continue to hold overweight positions in BBB and HY corporates, underweights in Treasuries and securitized assets

Risks: Debt securities are subject to risks such as declining prices during periods of rising interest rates and credit risk, or the risk that an issuer may not pay its debt. High yield securities are subject to increased credit risk as well as liquidity risk. The use of derivatives (such as futures) involves additional risks and transaction costs. Foreign investments involve additional risks, such as currency fluctuations and political, economic and market instability, which may be magnified for investments in emerging markets. To the extent that the financials sector continues to represent a significant portion of the Fund, The Fund will be sensitive to changes in, and its performance may depend to a greater extent on, factors impacting this sector. U.S. government securities may not be fully guaranteed by the U.S. government and issues may not have the funds to meet their payment obligations. The value of U.S. government securities may be affected by changes in credit ratings, which may be negatively impacted by rising national debt. The Adviser’s assessment of investments may prove incorrect, resulting in losses or poor performance. The Fund’s value may be affected by factors specific to an issuer within the Fund. When bond inventories are low in relation to the market size, there is the potential for decreased liquidity and increased price volatility. The Fund’s value is influenced the performance of the broader market. The value of mortgage-related and other asset-backed securities will be influenced by the factors affecting the housing market and the assets underlying such securities. In unusual circumstances, the Fund could experience a loss when selling portfolio securities to meet redemption requests for a variety of reasons. These and other risks are described in the prospectus.

Investing involves risks, including the possible loss of principal. The prospectus and summary prospectus contain more complete information on the investment objectives, risks, charges and expenses of the fund, and other information, which investors should read and consider carefully before investing. Prospectuses and summary prospectuses are available at thriventfunds.com or by calling 800-847-4836.
